

BIOZYME ADVANCED CARPET CLEANER

Bio-enzymatic Stain & Odor Remover

Most of our customers are familiar with Celeste's Biozyme EX3 – a multi-purpose biochemical cleaner, deodorizer and fabric freshener uniquely formulated to attack tough malodor issues. We have taken this same technology one step further to develop a carpet cleaner designed to combat the problems specific to high traffic and heavy use areas.

Celeste's Biozyme Advanced Carpet Cleaner combines new cleaning technology with bio-enzymatic action to provide enhanced cleaning as well as long-lasting odor control. While the product is designed for carpet extraction, it can be used safely on most fabric surfaces, including upholstery.

Carpets – and in particular high traffic areas – have inherent problems all of their own. Stains and soils are made up of particulates that are bound to the carpet by oily residues. Many cleaning products on the market today may leave behind embedded soils that leave high traffic areas looking dull or dirty in appearance. Furthermore, common stains or spills (such as drinks) leave organic deposits and odors in the carpet that can reappear after normal cleaning. As cleaned carpet is left to dry, sub-surface soils can gradually wick up into the carpet fibers making the carpet appear dirtier than when it was initially cleaned.

Mold – encouraged by moist environments – can grow on residual organics on the carpet pile, giving a musty odor and leaving a negative impression of a generally unclean environment.

Additional features include:

- Provides superior cleaning of carpet with additional benefit of odor control
- Maintains longer lasting odor control by eliminating source of malodors
- Extraction cleaning with Biozyme Advanced Carpet Cleaner eliminates musty mildew odors and helps prevent their return
- Effective cleaning power that prevents soil redeposition
- User and environmentally friendly
- Biodegradable
- Certified by the Carpet & Rug Institute (CRI)

BIOZYME ADVANCED CARPET CLEANER · Recommended Usage

APPLICATION	INSTRUCTIONS
Recommended for extraction cleaners	<ul style="list-style-type: none">■ Shake product well before use.■ Prepare a use-solution at recommended dilution by mixing 4 oz of Biozyme Advanced Carpet Cleaner per gallon of water.■ Follow extraction equipment instructions.

BIOZYME ADVANCED CARPET CLEANER · FAQs

Q: *Why must you shake well before use?*

A: This is because spores used in Biozyme Advanced Carpet Cleaner can often settle to the bottom of the solution. Shaking the bottle allows the spores to disperse throughout the solution to ensure optimum performance.

Q: *How long will a gallon of product last?*

A: This is dependent on the type of extractor used and how heavily the carpet is soiled. For best results, it is recommended to follow extraction equipment instruction.
